**Carport HCL KCR 5127**

[www.horaciocostalda.pt](http://www.horaciocostalda.pt)

O **Carport KCR 5127 (Urban Grey)** é uma estrutura elegante e funcional destinada a proteger veículos das intempéries, como sol, chuva e neve, oferecendo ao mesmo tempo um design moderno e sofisticado.

Descrição produto:

### 1. Descrição Geral

- Nome do produto:** KCR 5127
- Cor:** Urban Grey (Cinza Urbano)
- Fabricante:** Toyo Boeki (Japan)
- Tipo de produto:** Carport

### 2. Características Técnicas

#### a. Material

- Estrutura:** Fabricada com materiais de alta qualidade, geralmente em alumínio ou aço galvanizado, garantindo durabilidade e resistência à corrosão.
- Cobertura:** A cobertura é feita de materiais duráveis como policarbonato ou vidro temperado, que protegem contra raios UV e condições climáticas adversas.

#### b. Dimensões

- Tamanho:** Disponível em várias dimensões para acomodar diferentes tipos e tamanhos de veículos, desde carros compactos até SUVs .
- Altura:** Proporciona altura suficiente para permitir a fácil entrada e saída do veículo.

#### c. Design e Estética

- Estilo:** Design moderno e minimalista, com acabamentos de alta qualidade na cor Urban Grey, que se integra perfeitamente a diferentes estilos arquitetónicos.
- Personalização:** Pode haver opções de personalização para ajustar o tamanho e a configuração conforme necessário.

### 3. Vantagens

#### a. Proteção e Durabilidade

- Proteção Completa:** Protege o veículo contra os danos causados pelo sol, chuva, neve e granizo.
- Durabilidade:** Materiais resistentes garantem uma longa vida útil e baixa manutenção.

#### b. Facilidade de Instalação

- Instalação Simples:** Projetado para uma instalação fácil e rápida, com componentes pré-fabricados e instruções detalhadas.
- Flexibilidade:** Pode ser instalado em diferentes tipos de solo, como betão , asfalto ou relva.

#### c. Eficiência e Economia

- Custo-benefício:** Oferece uma solução económica em comparação com a construção de uma garagem tradicional.
- Eficiência Energética:** A cobertura pode ser projetada para permitir a passagem de luz natural, reduzindo a necessidade de iluminação adicional durante o dia.

### 4. Aplicações

#### a. Residencial

- Casas:** Ideal para uso em residências, proporcionando uma área protegida para estacionamento sem comprometer a estética do imóvel.

#### b. Comercial

- Empresas:** Pode ser utilizado em estacionamentos comerciais ou empresariais, oferecendo proteção para veículos de funcionários e clientes.
- Locais Públicos:** Adequado para uso em áreas de estacionamento público, melhorando a proteção dos veículos contra intempéries.

### 5. Manutenção e Cuidados

- Limpeza:** Requer limpeza periódica para remover sujidade e detritos, especialmente na cobertura transparente para manter a passagem de luz.
- Inspeção:** Realizar inspeções regulares para garantir que todos os componentes estejam em boas condições e apertados corretamente.
- Reparos:** Substituir qualquer componente danificado imediatamente para garantir a segurança e funcionalidade do carport.

### Conclusão

O Carport KCR 5127 é uma excelente escolha para quem busca uma solução prática, elegante e durável para proteger os seus veículos. Combina uma alta qualidade de materiais e um design moderno, proporciona tanto funcionalidade quanto um apelo estético que valoriza qualquer tipo de propriedade.

## Pérgolas HCL

### WIN SCREEN BLINDS

Thanks to the optional use of modern WIN SCREEN blinds, system gains additional benefits of better protection against sunlight, insects, enhanced privacy and improved thermal properties. Very rich colours palette matching pergola's structure and impressive blinds sizes - up to 7000mm

### WIN GLASS PANELS

WIN GLASS is an amazing combination of optimal visual and thermal comfort and protection against external conditions. Thanks to the use of 10mm toughened glass and unique, innovative technological solutions, the system ensures the safe use of every terrace's space, both at home and commercial properties. Wide selection of accessories, casing colours and glazing models will make WIN GLASS perfectly fit into any surroundings and meet even the most demanding expectations.

### HEATERS

4 heaters models available with power regulation, controlled via smartphone or tablet. Maximum power: 1500W. Casing made of extruded aluminium, available in two colours.

### INTEGRATED AUDIO SYSTEM

2 built-in 23W/80hm speakers, available in two colours and controlled via special audio app through Bluetooth.

### LED LIGHTING

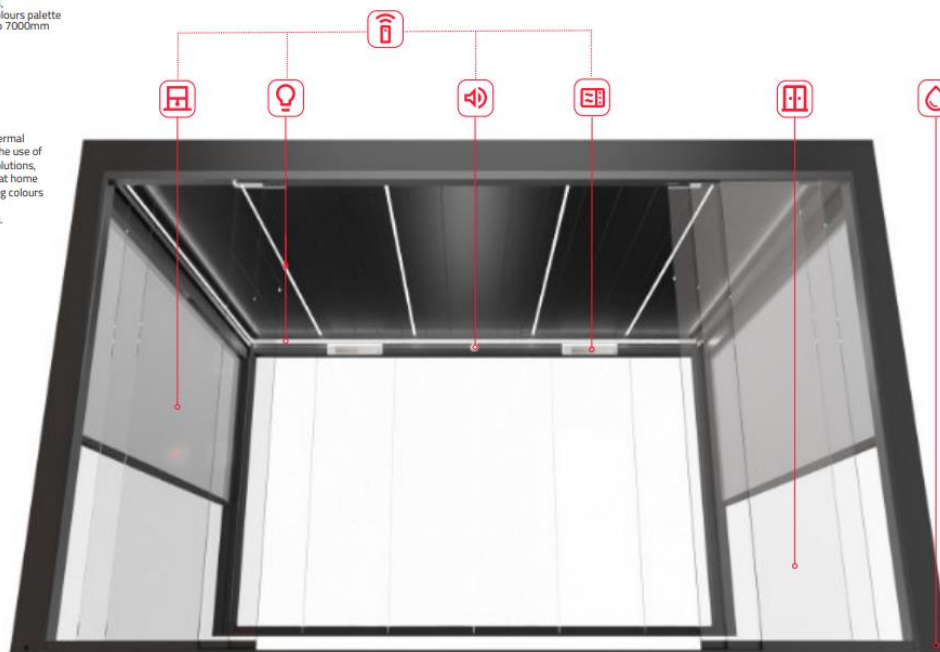

Impressive LED lighting configuration and integration options within pergola's structure: in the gutters or roof louvres. Available LED strips: WHITE, RGB or RGBW.

### SMART CONTROLS

Thanks to the use of a smart control panel, there is a possibility to control the pergola and all its accessories with a smartphone or tablet, from any location in the world.

### WATER DRAINAGE

Every WIN CLIMATIC pergola is equipped with an innovative water drainage system integrated and hidden within the structure.

### AUTOMATIC ROOF CONTROL

Adjustment of aluminium roof louvres, that can be turned in the range of 0° to 135° by remote control, smartphone or tablet. Full control over incoming sunlight and precipitation.

### RESISTANCE TO ATMOSPHERIC CONDITIONS

Snow resistant design with one of the best results in the world - WIN CLIMATIC can easily handle a 5000kg snow load at max available pergola size. It's also resistant to other weather conditions such as wind, rain and sun.

### TESTED STRUCTURE

Very solid frame ensures high resistance to loads coming from heavy snowfall, rainfalls or strong winds. Application of extra strengthening chambers, reinforced and special shaped profiles make WIN CLIMATIC one of the most durable pergolas available on the market.

### MATCH THE COLOUR FROM OUR PALETTE

Rich standard offer pergola colours: 3 colours in standard WIN CLIMATIC palette and 10 extra in the additional one. Possibility of choosing any RAL, TIGER, anodised or wood-like colour will allow perfect pergola adaptation to any environment.

### MADE TO MEASURE DESIGN

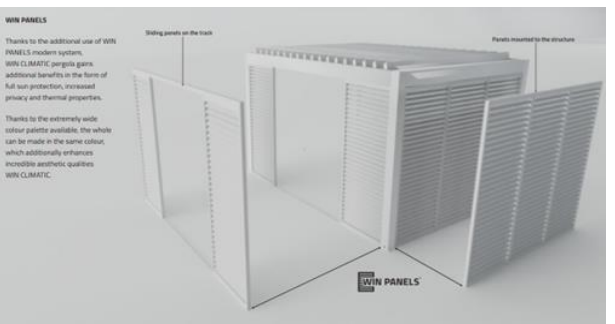

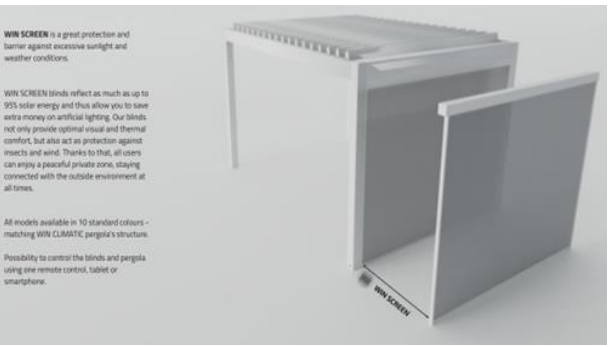

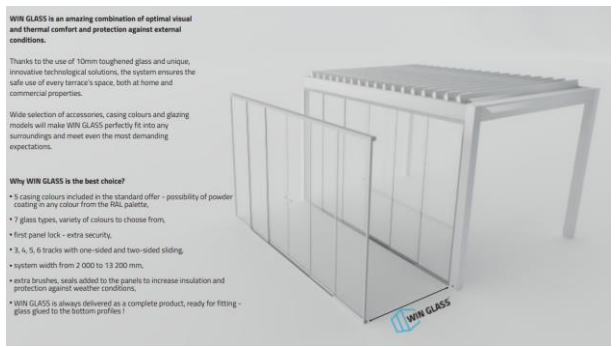

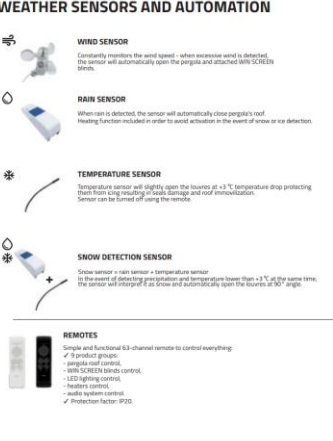

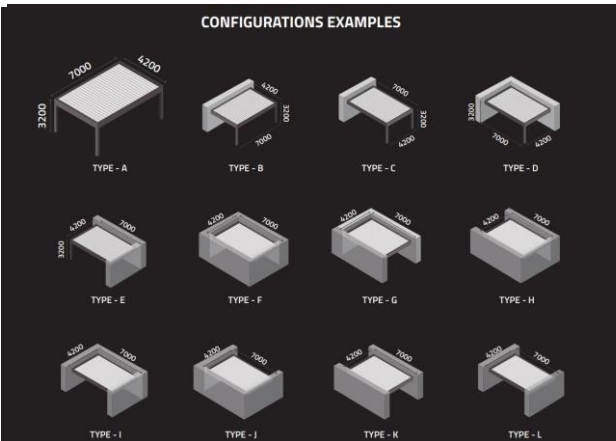

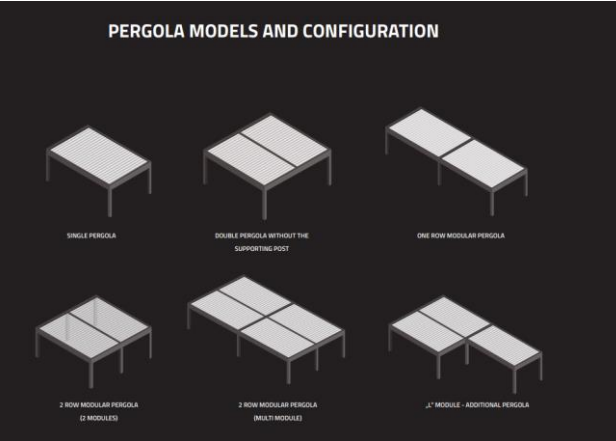

Highly aesthetic fixings, no visible screw joints, hidden motors and perfectly matched accessories, make WIN CLIMATIC a truly remarkable and unique product.

### WEATHER SENSORS

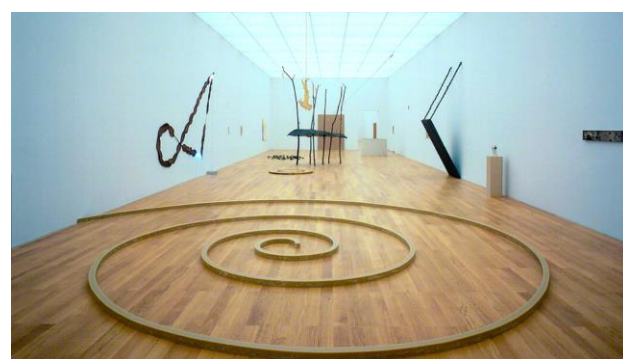

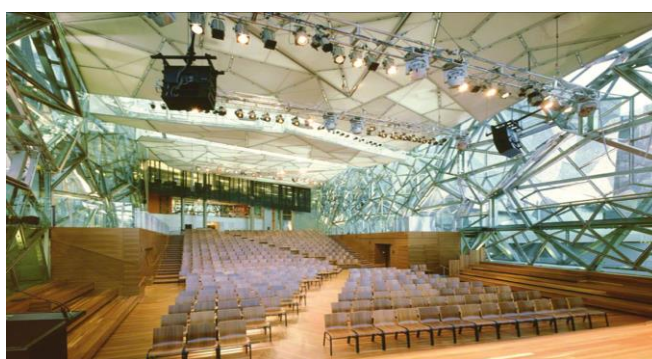

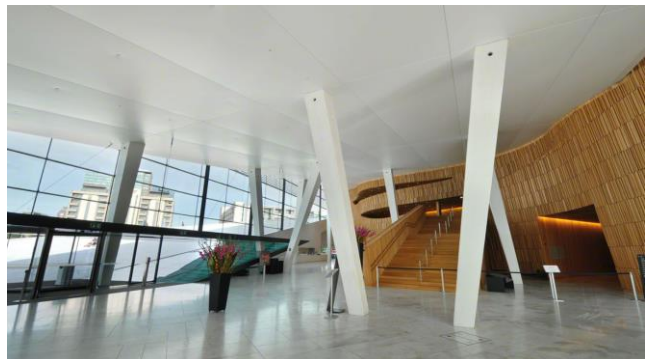

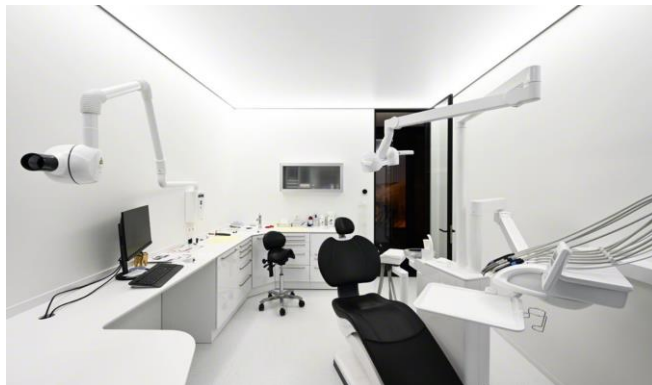

Possibility to connect most modern wind, rain, temperature and snow sensors, additionally strengthening pergola's resistance to weather conditions.

Armchairs

### The Box Lounger .

The box lounger is designed to provide comfort and privacy in any environment. With its elegant and modern aesthetics, it is an attractive and functional piece of furniture that fits perfectly into any space.

The chair is made of high-quality materials, including a sturdy, solid steel base and high-density foam padding, which makes it comfortable and durable. In addition, it has a special acoustic fabric lining that helps to isolate sound and reduce external noise, providing a more confidential and quiet environment.

The chair swivels 360 degrees, allowing for greater flexibility and ease of movement to suit different needs. In addition, the seat and backrest are adjustable for even more comfort and back support.

### Movile Puff RGB .

RGB is a comfortable and original bean bag, full of great details. Available in three colors: red, green and blue. Each version has five different shades of the specific color. All sides of the pouffe are different from each other, making it almost equally beautiful from every angle.

This beanbag comes on wheels, making it flexible and practical in mobile workspaces and other indoor areas, such as lounges, waiting rooms, and at home.
